Installation: To Fit Waterproof Wall Panels

Warranty: 5 Year Product Warranty

The Wall Panel Edge Trims are designed to finish off the span of wall panels in a professional way, similar to how a tile trim is used. They assist with water sealing the exposed and raw sides and top of the panels to ensure moisture is not entering the panel structure, whilst also giving the installation a nice, polished look. The trims are to be used in conjunction with the shower wall panels to create a full wall of protective lining for your shower and bathroom. Easy and flexible to install, these trims can be paired with the Shower Wall Panels in either 900mm or 1200mm wall panel system. They can be easily trimmed to size to suit your installation requirements.

A full wall of shower panels makes it easier to clean and maintain than a traditional tile wall. Cleaning becomes a breeze with no grout lines that can catch soap residue or chip away in time.
